

456. 5. 14
Vox Stellarum: 3
OR, A LOYAL 1726 3
ALMANACK
For the Year of HUMAN REDEMPTION,
M DCC/LXXX.

BEING
The BISSEXTILE or LEAP-YEAR.

IN WHICH ARE CONTAINED

All THINGS fitting for such a WORK; as,

A TABLE of Terms and their Returns;

The Full, Changes, and Quarters, of the MOON;
The Rising, Southing, and Setting of the SEVEN STARS,
and other Fixed Stars of Note; the MOON'S Age, and

A TIDE TABLE fitted to the same:

The Rising and Setting of the Sun; the Rising, Southing
and Setting, of the Moon; Mutual Aspects, Monthly Ob-
servations; and many other Things, useful and profitable

UNTO WHICH ARE ADDED,

Astrological Observations on the Four Quarters of the Year.

An **HIEROGLYPHIC**, alluding to these present Times;

A remarkable **CHRONOLOGY**; the **ECLIPSES**;

And other **MATTERS**, both curious and profitable.

With a particular Judgement of 2 visible Lunar Eclipses,
and many other Things relating to Astrology.

By **FRANCIS MOORE**. Physician.

L O N D O N,

Printed for the Company of **STATIONERS**, 17tho.

And Sold by **GEORGE HAWKINS**, at their Hall,
LUDGATE-STREET. [Price Nine Pence, fitt

Ephemerides
-478

A plain and easy TABLE, shewing the Time of HIGH WATER at all these Places under-named.

<p>Note, That the Moon's Age being taken notice of in the TABLE, you have the Time of HIGH WATER at all the under-named Places</p> <p>Queborough, Portmouth, Southampton, Kentish Knock, Leith, Beachy, Isle of Wight, Dunkirk, Calais, Coast of Flanders, at the Spits and Dover Pier</p> <p>Gravelled Downs, Blackness, Romney, Thanet, Scilly Half like, North Cape before Gocquist, and between Calais and Dover.</p> <p>London, Tinnmouth, Hartlepool, Amsterdam, Whitby, Bort, Galcoin, West of Ireland, at Grouin, at Rotterdam, and to Robin-Hood's Bay.</p> <p>Newcastle, Humber, Falmouth, Severn-mouth, at the Spurn between Scilly and Lizard, Ramsey, Dartmouth, Guernsey, Torbay, St. Malo's.</p> <p>Plymouth, Antwerp, Hull, St. David's, Helms of Bristol, Lundy, St. Paul's, Salcom without Wigan, at Waterford, and at Lynn Half-tide.</p> <p>Bristol-Key, Weymouth-Key, Auditorough, Roule, Lima, the Start before St. Nicholas, Sedmouth in the Channel, between Fox and Falmouth.</p> <p>Yarmouth-Road, Harwich, Calais-Road, Dover, Cowes, Caen, the Frith, South-Foreland, St. Helen's Coast of Normandy, and P'cary.</p> <p>Heur, Peter-port, Dublin, between Beachy and the Isle of Wight, Yarmouth, St. Magnus's Sound, Comboy, without the Callets in the Obse-nels.</p>

The foregoing Table explained.

NOTE, That the Moon's Age being taken notice of by the Rule in this TABLE, you may obtain the Time of HIGH WATER at all the Places above named. Observe, When the Moon is one or fifteen Days old, it is HIGH WATER at London, Tinnmouth, Hartlepool at 9 o'Clock, and 48 Minutes past. Observe the same of the rest, which is plain to the meanest Capacity. The Day of the Moon's Age you have in the 25th Column on every left Hand Page of the Almanack.

A TABLE of the **KINGS** and **QUEENS** of ENGLAND, from King **EGBERT** to our Sovereign Lord **GEORGE III.**

	700	0 11 8	0 23 4	0 35 0	0 70 0	0 105 0	0 140 0
	800	0 13 4	0 26 8	0 40 0	0 80 0	0 120 0	0 160 0
	900	0 15 0	0 30 0	0 45 0	0 90 0	0 135 0	0 180 0
	1000	0 16 8	0 33 4	0 50 0	0 100 0	0 150 0	0 200 0

If you would know the Interest of one Hundred Pounds for one Month, look for 100. in the Side; and in the next Column, under 1 Month, 8s. 4d.; for 2 Months 16s. 8d.; for 3 Months 21. 5s.; for 6 Months 42. 10s.; for 9 Months 63. 15s., and for a Year 84. and so of the rest.

This is the honest Way by which Men should
To Interest set their Silver and their Gold;
Yet worldly Misers, when to R. king fall,
They with their Interest get the Devil and all.

Something touching Natural Philosophy, and the Excellency of Astrology, by way of Vindication; and how far we are to confide therein.

I. MY Design in this is partly to satisfy the Curious, and partly to remove the Scales of Ignorance from the Eyes of modest Enquirers into Truth, by an humble (though just) Vindication of Starry Influences. To proceed then:

II. Astrology is an innocent, and a singular Science, which teaches us to judge of Future Events by the Motions of the Heavens, and Bodies therein contained and not by the Help of any prophetic or diabolical Inspiration, or Revelation (as the Ignorant think). 3 Nor think that the Stars have Power to force or compel the Will of any Man. No, they are natural Causes, and therefore they only incline; they cannot compel: and as the Poet saith:

*Fata regunt Fatuos, Sapiens dominabitur Astris,
Dum se Consilio, non Fato rite gubernat.*

I suppose we may English it thus, viz. Fatality rules Fools, wise Men rule the Stars, while they govern themselves by sound Council, and not by Fatality. And as the learned Kepler once said, the Stars could work no Effects upon the Body of Man, were there not a strong Principle in his Mind which did harmonically and violently close with their Influences, and lay hold upon all Occasions to effect them. This agrees with that excellent saying of Dr. Gell once in his Sermon before the Society of Astrologers. There is, (saith he) id bruti in Men, that they live so much by Sense that it is almost a strange thing that the Astrologer should predict false.

While Men live in a natural State, the Cœlestial Bodies have a strange and a strong Influence over them: but if Men were so wise as to keep the Laws of God in an universal Obedience, and learn to deny themselves of those they are naturally propense unto, the Heavens have but little Power over them, because they cannot reach the Faculties of the Soul.

And, therefore, but compel the Will or Mind. Their Immortal Soul would soar in a Sphere infinitely above those things they now obey. I say, could men attain to this, they would more admire the Supreme Being, and have a far higher Esteem of his Workmanship.

IV. Nothing is more certain, than that all Things were created by Almighty God at first; and from thence it is reasonable for us to think and believe, that he hath the wise disposing of them all: As also, that every individual Thing was made for some End or other, Why then should we think, that the Sun, Moon, and Stars, were created only for us to look upon, or to give light upon the Earth, since Holy Writ, as well as our own Experience, assures us to the contrary? We are obliged to believe, that all Things were made for what they are most fit to perform: And there is nothing in Nature of Power sufficient to change the Qualities of Earthly Bodies, but the sacred Influences and Energy of the Cœlestial World (I mean the Sun, Moon and Stars) which are undoubtedly, by the wise Architecture of an All-sufficient and Immortal Being, placed in sundry Distances and Spheres above us, for that very purpose; for no rational Man will pretend to deny, that God useth the Ministry of the Heavens, and Bodies therein contained, for the ordinary Government and Administration of this lower World.

V. No Man of an indifferent and common Sense will censure the Astrologian, who judges no further of future Events than as they are contrived or revealed in the Cœlestial Bodies, as Secondary Causes under God, the alone Author of our Being.

This we do affirm, that God doth ordinarily govern that which he doth make by those Things that are made; as these inferior and elementary Bodies depend upon the superior Causes, we also own that these second Causes depend upon God, the supreme and prime Cause of all Things. Nor do we pretend that God governs by these second Causes, as Princes by their inferior Magistrates, to whom they commit all, and do nothing themselves. But we do acknowledge all Things so to subsist, depend, live, and move in God; that if it pleaseth him to withdraw his divine Power from them, they become null and void.

[To be continued in my next.]

A TABLE of Terms and Returns for the Year 1780.

Hilary Term begins Jan. 24, ends Feb. 12.

Returns or Effoign Days.		Exc.	Ret.	Ap.	W. D.
In eight Days of St. Hilary	Jan. 20	21	22	24	Monday
From the Day of St. Hilary in 15 Days	27	28	19	31	Monday
On the Morrow of the Purif. of Bl. V. M.	Feb. 2	4	5	7	Monday
In eight Days of the Purif. of the Bl. V. M.	9	10	11	12	Saturday

Easter Term begins April 22, ends May 8.

From the Day of Easter in 15 Days	April 9	10	11	12	Wednesday.
From the Day of Easter in 3 Weeks	16	17	18	19	Wednesday.
From the Day of Easter in 1 Month	23	24	25	26	Wednesday.
From the Day of Easter in 5 Weeks	30	31	2	3	Wednesday.
On the Morrow of the Ascension	May 5	6	7	8	Monday

Trinity Term begins May 26, ends June 14.

On the Morrow of the Holy Trinity	May 22	23	24	26	Friday
In eight Days of the Holy Trinity	28	29	30	31	Wednesday.
From the Day of the H. Tr. in 15 D.	June 4	5	6	7	Wednesday.
From the Day of the H. Tr. in 3 Weeks	11	12	13	14	Wednesday

Michaelmas Term begins Nov. 6, ends Nov. 28.

On the Morrow of All Souls	Nov. 3	4	5	6	Monday
On the Morrow of St. Martin	12	13	14	15	Wednesday.
In eight Days of St. Martin	18	19	20	21	Tuesday
From the Day of St. Martin in 15 Days	25	26	27	28	Tuesday

N. B. No Sittings at Westminster-Hall on Ascension-day, Midsummer-day, and the second of February

The Exchequer opens eight Days before any Term begins, except Trinity, before which it opens but four Days.

Note, That the first and last Days of any Term are the first and last Days of Appearance.

Common Notes for the Year 1780.

 The 7th Day at 10 at Night, Venus } is with the Moon.
 The 9th Day at 2 in Afternoon, Mars }
 The 23d Day at Midnight, Jupiter }
 The 26th Day at 8 at Night, Saturn }

M. D.	Sun rises.		Sun sets.		Moon's South.	Monthly Observations.
1	7	30	4	30	8M 48	Some great Disputes abroad of War we hear,
2	7	29	4	31	9 40	Which we in England have no cause to fear.
3	7	27	4	33	10 30	We are not yet free from the Doubts and
4	7	26	4	34	11 19	approaching Fear of Dangers, notwithstanding
5	7	24	4	36	0 A 7	New Moon 5th Day at Noon.
6	7	22	4	38	0 52	standing endeavours are used to reconcile
7	7	20	4	40	1 34	many Differences now in debate
8	7	18	4	42	2 15	amongst us. We may hope well for
9	7	16	4	44	2 55	a better Understanding of Matters at
10	7	14	4	46	3 36	present in Question, and that the end
11	7	12	4	48	4 18	of our Fears may terminate in Safety,
12	7	11	4	49	5 3	Peace, and Concord. The good
13	7	9	4	51	5 52	First Quar. 13th Day near Noon.
14	7	7	4	53	6 40	Hand of Providence seems to direct
15	7	5	4	55	7 45	this Nation's Councils and Actions, so
16	7	3	4	57	8 48	that we need not fear the subtle Plots
17	7	1	4	59	9 53	and Designs of our most inveterate and
18	6	59	5	1	10 56	secret Enemies. About this Time let
19	6	57	5	3	11 50	those Military Commanders look to it,
20	6	55	5	5	Morn.	Full Moon 20th D. at 5 in Morn.
21	6	53	5	7	0 52	and prepare themselves to answer for
22	6	52	5	8	1 45	those Misdemeanours, or such treache-
23	6	50	5	10	2 35	rous Actions as they shall justly be
24	6	48	5	12	3 24	charged withal, and many deserving
25	6	46	5	14	4 13	Persons for their Trust and Prudence,
26	6	44	5	16	5 3	are as honourably preferred and advanced.
27	6	42	5	18	5 43	Many grave and sober Persons do now
28	6	40	5	20	6 45	Last Quar. 27th Day at 3 in Morn.
29	6	38	5	22	7 36	make it their Business to reconcile
						the Differences.

Venus is Occidental, and an Evening Star till the 10th of August, from thence she becomes Oriental, and a Morning Star to the Year's End.

M A R C H hath XXXI Days.

Of all Bless'd Virgins, Mary is the Choice,
In whom Men, Angels, Cherubims, rejoice.
The holy Gabriel from God doth descend
The sacred Maiden's Closet to attend;
With News divine, News of an Heavenly Birth,
Should from her Womb spring to bring Peace on Earth.

JULY hath XXXI Days.

St. James the Great, as if in Tabor, there
 He with his Master new transfigur'd were;
 First spends his Life in preaching of his Word,
 Then lays it down, a Martyr by the Sword;
 That, as before he was St. James the Great
 For Grace! so now for Glory the compleat.

AUGUST hath XXXI Days

The high and nobly born, St. Barthol'mew,
Coming to Christ, much People with him drew.
This valiant Hero for his Maister gave
His Skin, God's Truth, not his own Life, to save.
He being a fruitful Saint, it is but Reason
His Feast be kept in such a fertile Season.

SEPTEMBER hath XXX Days.

Matthew's (with Emphasis) call'd Publican ;
 The Publican and Sinner's but one Man.
 Lo! here a Wretch e'en in Perdition drown'd,
 Became a pious Convert safe and sound.
 Let no Man cry, therefore, with desperate Cain,
 His Sins are greater than can Pardon gain.

NOVEMBER hath XXX Days.

Ye blessed Spirits and exalted Souls
That shine in Glory, hous'd above the Poles !
Who once were poor Inhabitants below,
Dwelling in frail Flesh-tents, as we do now,
Lend your Assistance, ease our pious Plaints :
No Bliss like th' blest'd Communion of All-Saints.

Parturiunt Mortes.

First Quarter 3 Day, at 11 Night

This Month is attended with Variety of Configurations of the Planets, greater than any other Month throughout the whole Year; whose Effects should be very various, and produce as notable and remarkable Actions in the general. A troubled Fear possesses the generality of Men; and very uncertain News is spread

Full Moon 11 Day, at 8 Night

abroad. Many lying scandalous and malicious Pamphlets are now dispersed; for People's Ears itch after some novel Intelligence. Many dis-tempered Actions or Broils fomented.—Plentiful Matter is providing, and notable Things may in

First Quarter 18 Day, at 6 Night

a short Time manifest themselves. Division in Consultations how to quell the Spirits of some enraged and furious Persons. The Year draws to an End, and many lament the Loss or untimely Death of some eminent Person.—

New Moon 25 Day, at 8 Night

Tacere non nocet. The good Angel of God direct all England's Affairs, and preserve her sacred Interests from the Malice of her greatest Enemies this Year and ever. *Faxit Deus.* Amen.

The Dominion of the Moon in Man's Body. Passing under the Twelve Zodiacal CONSTELLATIONS.

♈ <i>Aries</i> Head and Face.	♎ <i>Libra</i> Reins and Loins.
♉ <i>Taurus</i> Neck and Throat.	♏ <i>Scorpio</i> Secret Members.
♊ <i>Gemini</i> Arms and Shoulders.	♐ <i>Sagittary</i> Thighs and Hips.
♋ <i>Cancer</i> Breast and Stomach.	♑ <i>Capricorn</i> Knees and Hams.
♌ <i>Leo</i> Heart and Back.	♒ <i>Aquarius</i> Legs and Ancles.
♍ <i>Virgo</i> Bowels and Belly.	♓ <i>Pisces</i> Feet and Toes.

The Names and Characters of the Planets. With the *Dragon's Head and Tail.*

♄ Saturn.	} ☉, or the Sun.	♀ Venus.
♃ Jupiter.		☿ Mercury.
♂ Mars.		♁ the Moon.
♈ Dragon's Head.		
♏ Dragon's Tail.		

The Characters of the Aspects.

♌ Conjunction.	} ☿ Opposition.	Δ Trine.
* Sextile.		□ Quartile.

Upon the Twelve Signs.

- ♈ The Head and Face the *Ram* doth always rule :
- ♉ The Neck and Throat are govern'd by the *Bull*.
- ♊ O'er the Arms and Shoulders still the *Twins* preside :
- ♋ Breast, Stomach, Ribs, the crooked *Crab* doth guide.
- ♌ The noble *Lion* rules the Back and Heart :
- ♍ The bashful *Virgin* claims the Belly Part.
- ♎ The Reins and Loins the equal *Balance* weigh :
- ♏ The *Scorpion* o'er the Secret Parts doth sway.
- ♐ The curious *Archer* doth the Thighs affect :
- ♑ So doth the *Goat* our bended Knees protect.
- ♒ The Legs unto *Aquarius*' Lot do fall :
- ♓ The *Fish* our active Feet their Portion call.

A CHRONOLOGY of many remarkable Occurrences
from the Year 1600, to this present Year 1780.

<i>Years of Christ</i>	<i>Years since</i>
1600 K. Ch. I. born at Dumferling in Scotl. Nov. 19	180
1601 The Earl of Essex beheaded	179
1603 Queen Eliz. died, having reigned 45 Years	177
1603 A great Plague in London, died 56570	177
1603 King James I. crown'd, July 15, at Westmin.	177

Table of some principal fixed Stars, with the Time they Rise, South and Set, either before or after the Seven Stars ; as also their Colour, Magnitude, and Meridian Altitude, by which they may be readily discovered.

Co- lour	Alt	Magn	Names of the Stars.	Rise h. m.	South h. m.	Sets h. m.
♂	53	1	Aldebaran, or Bulls Eye	1a 34	0a 48	0b 0
h 2	29	1	Left Foot of Orion	4 31	1 31	1 34
2 h	36	2	Middle * in Orion's Belt	4 13	1 51	0 35
♂ ♀	45	1	Right Shoulder of Orion	3 23	2 8	0 8
♀ ♂	21	1	Syrius, the great Dog	6 41	3 1	0 48
♂	43	2	Procyon the little Dog	5 33	3 53	2a 7
h ♀	30	1	Heart of Hydra	8 39	5 41	2 44
h ♂	51	1	Regulus, Lion's Haart	7 26	6 21	5 16
♀	54	1	The Lion's Tail, Denab	8 42	7 54	7 7
♀ ♂	28	1	Virgins Spike	12 46	9 38	6 36
♂ 2	58	1	Arcturus	10 47	10 30	10 12
♂	12	1	Antares the Scorp. Heart	17 36	12 39	7 42
h ♀	46	2	Bright * of the Vulture	17 38	16 3	9b 27
♀ ♀	6	1	Fomelhaut	11 14	19 11	10 37
2 ♀	56	2	Head of Andromeda	10 42	10 10	2 56

THE brightest of the Seven Stars is of the third Magnitude, and hath 61 Degrees of Meridian Altitude, and in Colour participates of the ♂ and ♀

The fixed Stars all rise, south, and set about four Minutes sooner every Night than they did the Night before ; this considered, the exact Time of the Rising Southing, and Setting for any intermediate Night, not herein noted, may be very easily deduced from these Tables, by Inspection only.

To know the Time of the Rising, Southing, and Setting of any Star in this Table, for any Day required, it is but considering how many Hours and Minutes that Star rises, souths, or sets, either before or after the Seven Stars on that Day, and you will have your Desire ; observing that in this Table, a stands for *after* and b for *before*.

Of the ECLIPSES of the two great Luminaries for
the Year 1780.

IN this Year there happens two Eclipses of the Sun and as many of the Moon; out of these four, only one will be visible in our Hemisphere, they happen in the following Order, as they were transmitted to me by my astronomical Friend, Mr. *Henry Andrews*, Teacher of the Mathematicks at *Roxton* in *Herts*, with whom Youth are conveniently boarded and taught, and made fit for Business; he also makes Barometers and Thermometers to the utmost Exactness.

The first is a solar Defect, upon Thursday the 4th of *May*, at 55 Minutes past 12 o'Clock at Noon, but if the Sun shine ever so bright, we shall see no Eclipse in these Parts of the World, by reason of the Moon's South Latitude. It will be a large Eclipse at the Cape of *Good Hope*, for in $6\frac{1}{2}$ Degrees of West Longitude, and about 44 Degrees of South Latitude, the Sun will be centrally eclipsed at Noon-day, and very near total.

The second is a partial Eclipse of the Moon, on Thursday the 18th of *May*, the middle Time of which is at 2 Minutes past 11 o'Clock in the Forenoon with respect to *London*, and the Eclipse will be over at 39 Minutes past Noon, therefore none of it will be visible to any Part of *Europe*; but in all the Western Parts of *America*, both North and South, as far as *Cape Horn*, this Eclipse will be visible; as also *New Zealand*, *New Holland*, the *Phillippine Isles*, *Japan*, *Yedso*, and upon the Eastern Coasts of *China*, and *Great Tartary*. Digits eclipsed at the middle are an Hand and an half on the Moon's upper Limb.

The third is another solar Eclipse, and happens on Friday the 27th of *October*, at about half an Hour past 5 o'Clock in the Evening, but as the visible Conjunction of the Sun and Moon will be much later, no Part of this Eclipse will be visible to us in *Great-Britain*. This Eclipse will be very large in some Parts of *North-America*.

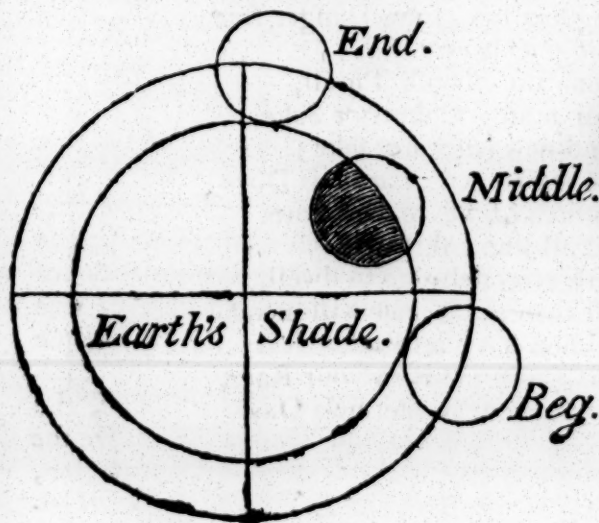

The fourth and last is a partial and visible Eclipse of the Moon, if (Clouds interpose not) on Sunday *November* the 12th in the Morning: At the Time of greatest Obscuration, the Moon is vertical to the Island of *Hispainola* in the *West-Indies*, in 60 Degrees West Longitude from *London*, and in 10 Degrees 26 Minutes North Latitude. Whence it appears that this Eclipse will be visible from the beginning to the
End,

End, to the whole of that great Continent of *America*, all the *West-Indian* Islands, and to most Parts of *Europe*, and all the Western Parts of *Africa*, which lies North of the Equator. The Moon will be observed first to touch the Shadow of the Earth (at *London*) at 7 Minutes past 3 in the Morning, the Time of greatest Obscuration will be at 33 Minutes past 4, and the Moon's lower Limb will leave the Earth's Shadow again exactly at 6 o'Clock, solar Time, after having been darkened to the left Hand 7 Digits and an half.

April the 19th in the Evening, the Moon will transit a Star of the 2d Magnitude in the Southern Scale of *Libra*, the following Delineation shews the Appearance as it may be expected at *London*, and will very well serve throughout the whole Kingdom; the Moon's lower Limb first touches the Star (at *London*) at 7 Minutes past 8, and she will leave the said Star again, a little to the Right-hand of her upper Limb (as the Type sheweth) at 3 Minutes after 9 o'Clock apparent Time.

N. B. A Telescope of some Sort will be necessary to observe this Occultation.

The Type.

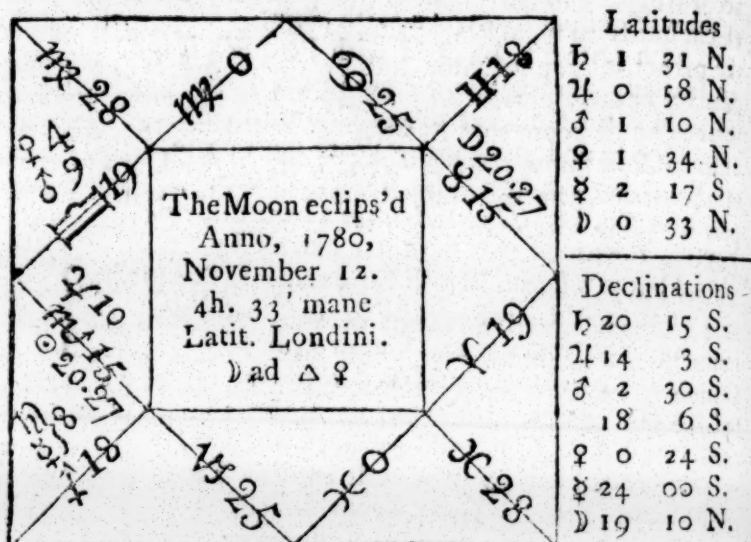

Type of the Occultation
April 29th.

Astrological Observations for the Year 1780.

My drowfy genius overworn with Age,
 Tired with Discord, batter'd with People's Rage,
 Can scarcely guide, less dictate to my Pen,
 The wish'd-for Comfort to my Countrymen;
 When bloody and all-wasting Wars shall cease,
 And we enjoy the hop'd-for blessed Peace;
 When we shall see *Great-Britain's* Foes allay'd,
 Traytors rewarded that hath her betray'd;
 When Heavn's fierce Wrath for our gross Surquedry }
 Her out-stretch'd Arm appeas'd, and sinful we }
 (Sinking into some grand Catastrophe)
 Our sinful Lives amend, Mercy implore,
 Our Pardon grant, to Favour us restore;
 When we are thus inclin'd we need not fear,
 But courteous Heaven to us will lend an Ear;
 We need not fear the Stars Benevolence,
 Will on us shed their grateful Influence:
 Great Men will then awake with awful Care,
 Dispel the Clouds which hide grand Treasons near,
 Discern 'twixt Truth and horrid Flatteries,
 Discard all those that love to tyrannize.
 Indulge good Men and just, then shall we see,
 Both you and the Kingdom too, from Danger free:
 Mercies abus'd, for Judgments ever call,
 This turns our Freedom into slavish Thrall,
 For God and your poor pining Country's Sake,
 Avoid the Danger, and new Measures take;
 Then shall we hope to see Heavn's harmless Dove
 Bring us the Olive Branch of Peace and Love.
 Religion flourish, and all know full well,
 This is the Land where God delights to dwell.
 'Till then and not 'till then the Times will mend,
 Horrid and dire Confusion have an End,
 Sun, Moon, and Stars, assist me with your Rays,
 Grant Power as you were wont in *Hermes's* Days.

To speak of this lunar Eclipse whose Type is on the other Page. This Eclipse seems to denote some hasty and martial Proceedings to ensue, and some untoward Actions in those Parts of the World concerned thereby, and they are those Cities and Countries under the Sign Taurus, viz. *Russia, Poland, Sweedeland*, the North Part of *Lorrain*, and our neighbouring Country *Ireland*, &c. *Justinus* saith, when an Eclipse of either of the Luminaries shall happen in an earthy Sign as this is, it signifies Scarcity of Fruit, and Corn, &c. Besides, there are two Eclipses at the Lunations one after another, *Hermes* saith, *Fiunt in Mundo multa Incommoda, quando erit in uno Mense utriusque Luminaris Eclipse*, &c. There shall be many Troubles in the World, when in the Space of one Month both the Luminaries shall be eclipsed, but chiefly in those Places wherein there is a special Signification of them, but seeing 'tis but a small Eclipse of the Sun, and not a very great one of the Moon, their Significations are to be less taken notice of. Moreover, the Sun's Eclipse will not be visible here, and some Astrologers of good Note have said, *Nil nocet Eclipse illis Regionibus in quibus non videtur*. That the Effects of the Eclipses are not felt where the Eclipse itself is not visible (notwithstanding

standing what I have said before herein of Leovitius) and according to Ptolemy, Lib. ii. cap. 8, Eclipses operate more efficaciously to such Places where they are vertical, or where the principal Significator shall in the Time of the Eclipse pass by their Zenith, &c. I shall not therefore insist any further here upon this Eclipse or its Effects, but shall draw unto a Conclusion, and say that some of the Configurations of the Stars seem to foreshew some notable Doings to happen in some Parts of the World Northward, and North-East and Westward, especially in those Places that are under Taurus and Scorpio, and those that are under Aries and Libra may be somewhat concerned too, (though some People who have been for some Time past under the Concerns of War, may be desirous of Peace, and it is probable may obtain it, yea, even perhaps before the Publication hereof) yet whatever the Stars may seem to signify, it is God that governs and does all Things. It is He that causeth Peace and War, Plenty and Scarcity, &c. He changeth the Times and Seasons; he removeth Kings, and setteth up Kings, *Dan. ii. 21.* All Nations before him are as nothing, and they are accounted to him less than nothing and Vanity. *Isa. xl. 17.* He poureth Contempt upon Princes, and weakeneth the Strength of the Mighty; He encreaseth the Nations, and destroyeth them, He enlargeth the Nations, and straitneth them again, *Job xii. 21, 23.* Let all Glory be given unto his holy Name. And so much for these Eclipses. But I must beg an Excuse for the Error on the Type of the Lunar Eclipse for the 30th of May last, being shaded on the wrong Side, for it was sent right by my Correspondent.

Now I will give you one of the Prophecies of Nostradamus, which is fulfilling in these Times. It is the 28th in the 6th Century; it runs thus in the French Language.

Le grand Celtique entrera dedans Rome,
Menant amas d'exilez & bannis;
Le grand Pasteur mettra a Mort tout Homme,
Qui pour le Coq estoient aux Alpes unis.

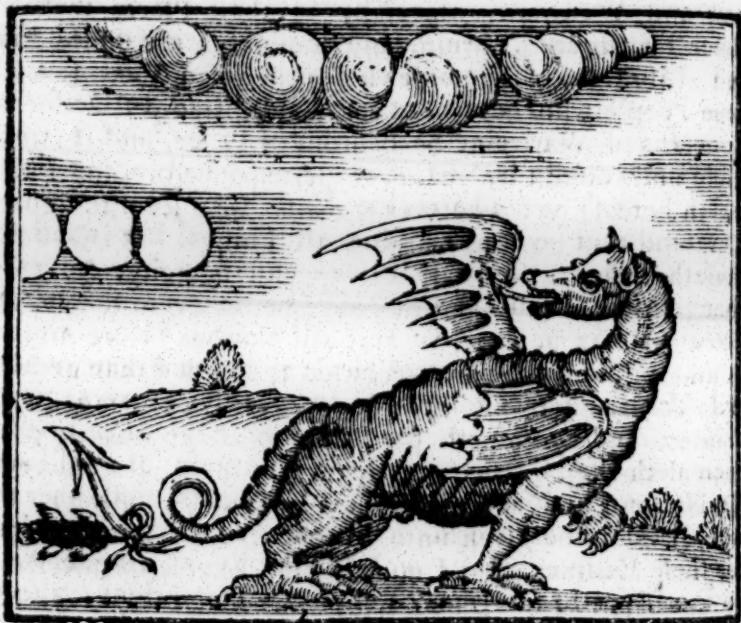

In English thus:

The grand Celtique shall enter into Rome,
Leading with him a great Number of banish'd Men,
The great Shepherd shall put to Death every Man,
That was united for the Cock near the Alpes.

ANNO-

ANNOTATIONS.

Because this Word Celtique is often repeated in the Prophecies, it would not be amiss to satisfy the Reader of the Meaning of it, it is properly the Nation of the Flemings, and some others of the Low-Countries, as far as the Maze, and the Rhine, which anciently was called Galli Celtæ; by the great Shepherd is meant the Pope, and by the Cock is meant the French Nation. The rest is easy.

The preceding Hieroglyphic represents a flying Dragon and a Mole tyed together by their Tails; the Dragon is in great Distress, and seems ready to take his Flight, but is prevented or retarded by the Mole, but as it seems easy for the Mole to slip his Tail out of the Knot, when he sees an Occasion, so it may be expected that they will soon be separated, and they will disappear and be found no more: From hence I say there are secret Cabals and Negotiations now carrying on in the several Courts of Europe; the Spirit of Enthusiasm, Superstition, and religious Frenzy seems to possess the Heads of many Men, especially of the Ecclesiasticks; in some Popish Countries they seem to be very fond
of

of some Project yet in Embrio, but they will soon know that their mighty expected Birth will prove an Abortion, and the Mischievousness of their Designs, and the Greatness of their Malice will be discovered, and thus the all-seeing Eye of Providence will blast their Designs, and turn their Venom into an Antidote; and so I come to the Winter Quarter.

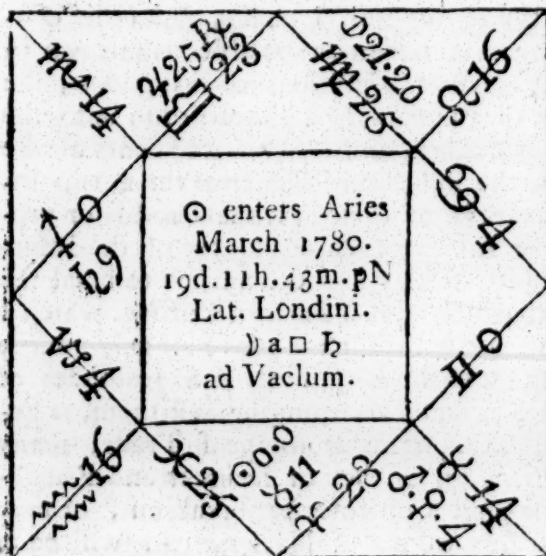

Of the Brumal or Winter Quarter.

Now this Quarter enters at such Time as the Sun touches the first Scruple of the tropical Sign Capricorn, which happens on *Tuesday November* the 21st, 1779, at 10 at Night, at which Time 9 Degrees of \cap , ascends on the East, and 2 Degrees of Gemini culminates on the Med. Caeli. Now Venus and Mercury are conjoined in 15 Degrees of γ and δ is applying to the square of \jmath and η to the square of Jupiter, and six of the seven Planets are under the Earth, only the Moon in the Med. Caeli going from the Opposition of \jmath to the Trine of \mathcal{U} , and thus stands the Position; and though the Season is unfit for Action, yet we shall assuredly find it a very busy Quarter for Consultation, since here are no less than five of the seven Planets in three Signs, as those may see that please to set the Figure, whence I shall deduce this following Judgment, for by a curious Inspection into the celestial Cabinet of Nature, involved and absconded in the several Configurations of the Planets, Prodigies, Conjunctions, Eclipses, Comets, and other concomitant Causes, we might thereby be able to discover in a great Measure, the several Mutations of Kingdoms, the grand Revolutions of Empires and Dominions; also the most remarkable, sublunary, and general Accidents of the World, &c. Now the Position of the Heavens at this Ingress, I must acknowledge to be no ways favourable or promising, in regard of the approaching square of the Infortunes which presageth Misery and Calamities to besal the Generality of Mankind in several Parts of Europe, which I delight not to aggravate. People are now strangely posselt, and afflict themselves with many Fears and Jealousies of some secret Mischiefs secretly hatching against them, a general repining and Complaint for want of Trade, many treacherous Consultations, Breach of Leagues and Friendship, and some unhappy Controversies break out; or may daily be expected, but we may justly hope this will be of no long Continuance, for before the Quarter terminates,

we

we may expect a better Understanding, and more pleasing News in England, and very great Hopes of an approaching Tranquility to general Satisfaction. This Quarter will be spent in brisk Disputes, with much Averfeness of Spirit in some active Persons; also many Rumours and Reports fomented by ill minded Persons, Enemies to the English Nation, wherein both the Persons and Actions of some noble Heroes of this Nation may be grossly reflected upon and abused. I am very sensible that great are the Expectations of most Men what will be transacted amongst us this Year: Let the Endeavours of our greatest Enemies be what they will, after a Labyrinth of Troubles, Malice, War, and Bloodshed, an happy Peace may possibly follow, and at this Juncture much Pains is taken to effect the same; and for the Diseases of Mankind, 'tis to be feared they may be more violent than ordinary, in regard of the Platick Square of the Infortunes at the beginning of this Quarter.

Look up, my Friends! See how the Planets reign!
 What News from Tripoly, from France, from Spain?
 When dares the Turks o'er Germany advance,
 And who's the Man must crush the Pride of France?
 But hush! with these Things what have we to do?
 The World will still be mad — so let them go.

Latit. Planetarum

♁	13	48	North
♂	4	20	North
♂	7	30	North

According to exact Calculation, the Spring Quarter commences March the 19th, at 11 Hours 43 Minutes at Night, at which Time 25 Degrees of Virgo culminates, and the beginning of Sagitary ascends, and the Planets are posited as you see in the foregoing Scheme. From hence I infer that this may be a Year of Admiration, and many material Matters will this Quarter be transacted and put in Agitation; whence some Persons of Note may fall under the Severity of the Law, or at least be in great Danger thereof. The Influences of the Configurations now depending, are appointed by Divine Providence, to manifest their Effects (both good and bad) in the Courts of Princes, and in all Probability among some of the most eminent Families in Europe. God direct them for the best in their great Councils and Consultations, and grant they may end in a general Peace and Unity, which is now much desired and hoped for; and so far as may be rationally conjectured, this Quarter (and indeed the whole Year) we may expect to hear of very serious Consultations, of high Concernment, tending to the Settlement of Affairs, and yet continue in a Posture of Defence, though I hope there will be very little Danger of Action. — Yet many People will murmur and repine at the present Management of Affairs, though some perhaps may not be able to give any good Reason for the same, and I say (as formerly) the most material Configurations of this War do still rather give Hopes of an happy Peace in the European Kingdoms, than any more War to ensue, though I am satisfied that the Heavens shew only the Natures and Inclinations of Men, not positive Conclusions, and now they are inclined to Peace and Unity so strongly, we may rationally hope and conclude it may end happily, which is the earnest Desire of thousands. Blessed are the Peace-makers, and cursed are the War-makers

Of the Summer Quarter.

This Quarter takes beginning when the Sun touches the first Scruple of Cancer, which this Year initiates the 20th of June, at 10 at Night, at which Time we have 28 Degrees of Capricorn ascending, and the beginning of Sagitary on the Med. Cœli, the Moon separates from the Sextile of ♄ and applies to the Opposition of ♀ from the first and 7th Houses, and to the Trine of ♃, which seems in general Terms, (notwithstanding all Opposition) to portend Peace and Plenty to the Subjects of this our Nation, *non obstante,* their

their groundless Fears; whence they may take Encouragement, and trust to Providence; and if in our astrological Conjectures we do not exactly hit the white, let none condemn the Art as uncertain, since no Man can promise a certain and indubitable Prescience of future Events or Contingencies. — But as the learned Physician who prognosticates what the Issue of a Distemper may be in a sick Patient, so we Students in the Art of Astrology, may give Warning to Mankind of the Dangers approaching or impending, that by Prayer and humble Submission to the Almighty, we may be thereby preserved from his Judgments, which we by our Sins have brought upon us. — And indeed no Man breathing can pretend to an absolute Infallibility in Predictions, such a Fore Knowledge only belongs to God, who created the Stars, and perfectly knows their Natures and Virtues, and how their Influence operates upon humane Bodies. But astrological Predictions or probable Conjectures of future Events from second Causes, I hope without Offence, I may (as for many Years past) freely offer, as harmless and inoffensive for the general Satisfaction of the Publick, who annually expect my Sentiments, deduced from astrological Principles, as to the general Accidents of mundane Affairs.

The Autumnal Quarter begins when the Sun (to vulgar Appearance) touches the first Scruple of the Equinoctial Sign *Libra*, which this Year happens on the 22d of *September* half an Hour before Noon. The most considerable Aspects near this Ingress are a Conjunction of δ and ζ , a Square of η and ζ and another of η and δ , with a Sextile of \odot and η ; from hence I say, God directs Men's Minds to require Justice, and their Superiors to incline thereto — The Minds and Opinions of Men are various, their Actions many and of different Nature. I fear this Quarter may be more sickly than was expected, and thereby afflict many People with such tedious and unnatural Distempers, which may too often nonplus the most able Physician.

F I N I S.
